

LEADING THE WAY IN SUPPORT SERVICES FOR GAS AND OIL EXPLORATION, DRILLING AND PRODUCTION

SPS

SUPERIOR PIPELINE SERVICES

SPS – A LEADING PROVIDER OF POST-DRILLING OIL AND GAS SERVICES

Founded in 2001 in Fort Worth, Texas, Superior Pipeline Services (SPS) provides world-class, post-drilling oil and gas services to energy producers in the Greater Dallas/Fort Worth region. With facilities local to our service area, SPS is highly responsive to the time-critical needs and on-demand support often required by the energy industry. We also offer full maintenance support and around-the-clock emergency repair services to both natural gas producers and local gas distributors.

Founder, Lynn Ayres, notes, “There have been occasions when, with only a day’s notice, we have arrived on-site, fully equipped and ready to go. We’re proud of our dedicated staff and ever-expanding pipeline services in the Dallas/Fort Worth region and outlying areas.”

With our expertise in post-drilling, maintenance and emergency services, SPS provides a complete range of offerings.

Services Include:

- Pipeline Construction
- Wellsite Preparation / Dirt / Rock
- Construction of Containment Rings
- Installation of Tank Battery and Production Equipment
- Installation of Metering Facilities
- Wellhead Hook-Up
- Custom Fabrication
- Sandblasting and Painting
- Site Cleanup
- Gas Distribution Services
- Lease Maintenance
- 24 / 7 On-Call Emergency Service

Lynn Ayres was raised in a contractor family, spending 20 years learning the business from the ground up. He worked with his father, Chick Ayres, who ran a company which provided services for local oil companies.

“Time is our greatest challenge. There’s a lot of pressure from both producers and distributors to meet strict schedules. You’ve got to be on time or you’re out of business.”

– SPS Founder Lynn Ayres –

Engineering and Construction Services:

SPS also provides a full range of expert engineering and construction services involving the perimeter trunk system. This system gathers natural gas from a series of wells and enables the connection to pipeline systems that feed various gas processing facilities.

Gas Maintenance and Emergency Services:

Gas maintenance and emergency (GME) services are an increasingly important aspect of the oil and gas industry. As a full service company, SPS offerings include the fabrication and installation of measuring meters, re-routing of gas pipelines, installing gas lines to housing developments and subdivisions, and upgrading, replacing and maintaining infrastructure.

Focus on Safety:

Safety issues are of paramount concern to SPS. We take every precaution to ensure the integrity of your pipelines and provide for worker safety. As the volume of natural gas increases, it is ever more important to employ the strictest safety standards possible in all the work we do. SPS exercises unsurpassed diligence in protecting your investment.
